How The Robots, AIs & Automation Will Humanize Us

Bombarded by headlines, hashtags, and Hollywood blockbusters depicting an army of job-killing robots and an AI-fueled apocalypse, it's no wonder that Automation's real story escapes us.

But these intelligent technologies won't rob us of our humanity: in fact, they'll help us restore it.

Instead of replacing our value, Robotics, AI, IoT, Blockchains, and Big Data now gives us the tools, and time, to create unprecedented levels of value across companies, industries, even entire countries.

Where mobile apps have demanded our attention, intelligent bots will lessen distractions by acting on our behalf. AIs will fix broken systems, like turning reactive "sick care" into predictive health care.

Robots will allow the elderly to live independently, the disabled to move about freely, and doctors to dissolve borders completely — they'll simply perform surgeries across continents remotely.

Far from hurting us, these systems will protect us: From sensors in the soil preventing famine, to biosensors in the bloodstream eradicating disease.

At its heart, this new digital order is built upon inclusion—not division—as drones bring the Internet to the next billion, and Blockchains bring billions more into the global economy. And the "CoBots" will give executives that most elusive element . . . more time to focus on more of the innovations that matter.

Even this era's most critical success factor won't be technological: it, too, will be uniquely human. A Reskilling Revolution—unrivaled in size, scope, and scale—will prepare us for this fast-approaching future.

And leap we must! Where many in America view intelligent tech as a big threat, China, is already building out for a BIGGER opportunity (and investing billions to win The AI Arms Race).

In This Session:

In this eye-opening, thought-provoking session, innovation keynoter, futurist, and professor Christina "CK" Kerley takes audiences across how the Robots will liberate us, AIs will revolutionize us, and Automation will humanize us.

Technologies featured include: Robotics, AI, IoT, Mobile, Health Tech, Blockchain, Big Data, and Cloud Computing.

What Companies Say About CK:

*CK changes the energy level of a room...
and it only gets better as she speaks!* 

*CK's content, style, passion,
and performance are bar none!* 

*By the end of CK's energetic, engaging
speech, everyone is thinking, "How do
I make this happen in MY business?"* 

*CK's insights, incredible energy
and contagious passion gives
marketers the guidance they need* 

*CK's passion and humor is
beyond compare—she really takes
innovating your business to heart* 

*An exceptional speaker, I hung
on CK's every word as she made
complex technical concepts
accessible to everyone!* 

*With humor and high energy,
CK easily transfers her passion
for innovation to her audience* 

*CK never just "brings it"...
she has a way of bringing it BEYOND!*

*An engaging speaker who makes
everyone feel connected,
inspired and thirsting for more* 

*CK's session was in many
ways a game-changer
for our future plans* 

*CK was phenomenal — incredibly fun,
knowledgeable, and engaging!*

*A rare presenter that meets
the needs of those that are new
to tech and those with experience* 

*One of the most-gifted
presenters I have ever seen* 

*Incredibly informative
and entertaining* 

*CK has a gift ...
we were all mesmerized!* 

*A powerhouse of knowledge,
passion and engaging delivery*
