The Tech And Trends Reshaping Our Lives, Our Work—And Our World

Humanity is experiencing record-setting levels of disruption at an unprecedented, unimaginable pace.

In just a handful of business quarters, the near future has shifted from smartphones to smart things, from apps to algorithms, from devices to data, from the 2D Web to 3D Virtual Worlds . . . and so much more.

Where mobile made our phones smart, IoT turns ALL things smart as the physical world becomes digital's newest, boldest, and BIGGEST frontier.

The Next-Gen Web is breaking out of the box—and outside of our screens—into an exciting new ecosystem of connected products, places, and proximities.

Intelligent automation is bringing sophisticated new capabilities. . . and a savvy new collaborator. Enter the “CoBots,” collaborative robots that take away some of our tasks while giving us back more of our time so we may ignite new industries (and create better jobs!).

While the 20th century belonged to computers, the 21st will belong to intelligent machines as AIs predict our needs, protect our health, and propel our businesses.

Our planet is becoming datafied, our activities are getting digitized, our machines are being cognified, the next BIG things will be nano-sized, and much more!

In this high-energy, highly interactive session, innovation speaker and futurist Christina “CK” Kerley explores the tech and the trends that are reshaping our lives, revamping our work—and revolutionizing our world.

THE STATE OF INNOVATION

10 NEXT-GEN TECH • 2017 • 5 MEGA-TRENDS

Attendees Learn 5 Megatrends Spanning:

- 1: The EXPECTATION Economy:
Constant Connectivity Changes Humanity And The Economy
- 2: From Smartphones To Smart EVERYTHING:
The Physical World Is Digital's Newest, and BIGGEST Frontier
- 3: The Next-Gen Web:
The Web Gets Experiential, Contextual, Visual & More
- 4: Man-and-Machine Collaboration:
Intelligent Automation Gives Rise To The CoBots
- 5: Data & AI Win The 21st Century:
Moving From The Information Age To The Intelligence Era

Technologies Covered Include:

Mobile, The Internet of Things Big Data, Wearables, Robotics, (IoT) Artificial Intelligence, Immersive Tech (AR, VR, MR), Health Tech and more!
