

# TECH MEGA TRENDS

View All CK's  
12+ Speeches  
Across 10+ Tech

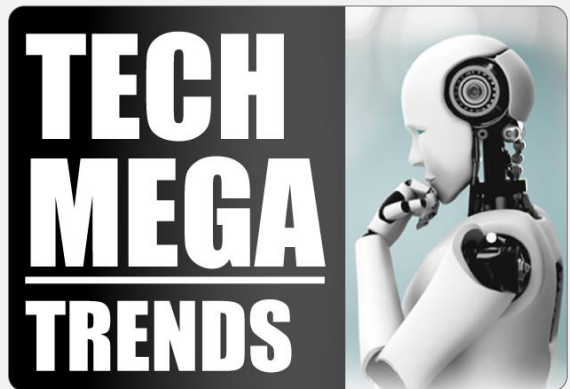

In this captivating session audiences embark on a tour of The Tech Mega Trends that are radically reshaping our world.

The rise of the robots will not mark the end of humanity's reign, but rather the beginning of an extraordinary era in human-and-machine partnerships. Computing's next frontier extends outside of computers—as Spatial Computing propels us from fixed screens into the realm of flexible holographic displays, presenting boundless opportunities for innovation.

As technologies multiply, our world becomes an ever-expanding web of interconnected environments, through which an astronomical influx of data flows: across the digital Internet and the physical Outernet . . . to the 3D Metaverse and the burgeoning Mirrorworld of digital twins.

Undergoing revolutionary transformation across all fronts, the Web will be utterly unrecognizable within five years. AI will turn search engines into action agents, where personalized experiences are the norm (and “point-and-click” inefficiencies are a punchline).

Blockchain will further force dis-intermediation of business models, while The Creator Economy will become an even greater socio-economic force to be reckoned with. And in this Age of Acceleration companies young and old alike will realize this paramount truth: survival is a function of speed, and success is dependent upon relentless reinvention.

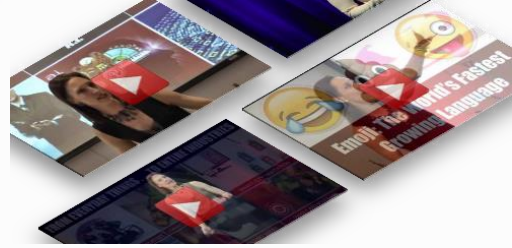

With 25 years of experience delivering engaging and educational tech keynotes and trainings Christina “CK” Kerley is renowned for her charismatic personality and relentless reinvention.

Her extensive range— a catalog of 15+ topics across 10+ technologies—sets CK apart from other speakers

Get Inspired. Get AHEAD.
